

Max Shell Cart Cover

This innovative cart cover provides environmental protection and improves heat retention to your meal delivery process. Simply load up your cart, strap down your trays and put on this cover. Heat is kept in or out to keep meals at safe temperatures longer. The tear-proof resin material is exceptionally durable and water and chemical resistant to ensure proper sanitation. Designed to fit over our most popular delivery carts, we also offer custom fit covers to meet our customers' needs.

• Superior Construction

Corner rivets placed at all potential stress points so seams won't tear and extra heavy duty Velcro closures ensure a secure seal to the doors

• Improves Temperature Retention

Covering the trays during transport holds heat in or out and for even greater temperature retention an insulated cover option is available

• Convenient Velcro Closures

Velcro doors swing open for easy access with extra heavy duty Velcro closures that won't wear out even after years of use

• Improve Sanitation

Not only do you provide protection against outside contaminants to the contents of the cart, but the cart covers themselves are water resistant, chemical resistant and can withstand temperatures up to 400°F to clean the cover in the dishmachine

• User Friendly

Velcro side tabs hold the doors in the open position for unobstructed access to the contents on the cart while distributing meals

CLEAR POCKET

Keep meal delivery instructions or other important documents readily available and protected in the clear pocket on the outside of the cover
