

DRAIN DEFENDER SYSTEM™

The Drain Defender System is changing the paradigm in the industry! This system replaces your existing drain cover with our unique interacting cover/basket(s). The basket(s) is set down in the drain and our drain cover allows for easy access to it. This provides for a simple placement of our proprietary all-natural and eco-friendly DEFENDER disc. The Drain Defender cover is manufactured using industrial strength 14-gauge stainless steel and high impact ABS plastic components to withstand the rigors of a commercial environment.

Minimal installation:

- Simply remove the original drain cover.
- Place our fitted basket(s) in drain pipe opening.
- Take our unique cover with access lid and install using original screws

Easy maintenance:

- Open hinged plastic lid from rotating lock.
- Insert 2 proprietary compound discs and pour half gallon of water down each drain. (First time only)
- Close lid and lock.

The Drain Defender System now offers two different options for you to choose from:

EXPLODED VIEW
(Basket w/ Strainer)

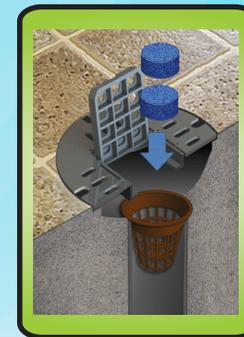

IN GROUND VIEW
(Basket Inside Strainer)

1) We have partnered up with Drain-Net so that you can now combine our proprietary disc basket with the patented Drain-Net strainer. The strainer prevents drain clogs from food, trash, and debris.

EXPLODED VIEW
(Single Basket Unit)

IN GROUND VIEW
(Single Basket Alone)

2) We also have a single basket unit that you may purchase by itself (along with a cover). If you already own a Drain-Net strainer, you can pair this product with it.
