

Sink Defender is a small plastic ball filled with the same proprietary compound as our Drain Defender System. The Sink Defender is an effective release mechanism to prevent fruit flies, remove odors, and keep drain pipes clear. (Perfect for hand washing sinks).

Designed for sinks of all sizes. Sink Defender is all-natural, and eco-friendly. The Sink Defender has **no** pesticides and **no** chemicals.

How It Works:

Place one ball in each sink (only sinks with no garbage disposal) where the strainer is located. Each ball will last around 10 days (depending on water usage) -three balls per package. When the compound has dissipated, simply dispose ball in the recycle bin and place a new one in the sink.

Another Problem Is Solved!

Please note: Product Is Not Intended For Use In Dishwashing Sinks.
