Gas Char Broilers with FLARETROL®

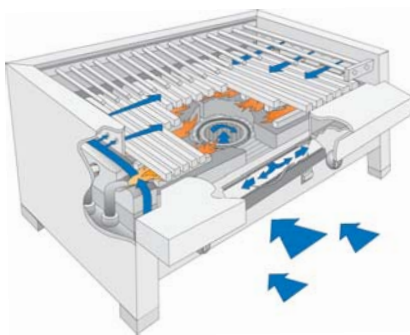

Gas Char Broilers

“EmberGlo’s Fire Breathing Legend”

EmberGlo’s eye-catching glowing hearth will reach a temperature of 1800° searing your meats yet preserving their natural flavor. Only EmberGlo® Gas Char Broilers feature the special inshot gas burners that supply broiling heat to a durable, completely ceramic hearth. The Barbriq® transmit searing radiant heat to the meat utilizing its natural juices and creating more natural fuel. Burner jets are located along the sides, in the recessed hearth, instead of below it. This design prevents the jets from becoming clogged with dripping grease or food particles, cleaning the burner unit with exceptional temperature control. Open Hearth Gas Broilers feature EmberGlo’s exclusive Flaretrol® system—the most effective means of flame control for open hearth broiling. When grease starts to flare up, simply flip the Flaretrol® switch and a steady stream of air brings the flames under control. EmberGlo’s Open Hearth Broilers give that great outdoor flavor with indoor convenience.
