Specifications

Mixing system

The VARIMIXER W80A is a planetary mixer with a variable speed drive system. The mixer frame consists of a column with welded-on feet, and a top traverse closed by a stainless steel cover. The bowl is mounted in bowl arms which are manually raised and locked simultaneously - or lowered and opened, respectively. The column contains the motor and the bowl arm mechanism. The top traverse contains the transmission system consisting of the moveable pulleys, the intermediate belt drive and the planetary head. Start and stop push buttons are mounted on the frontplate along with a 15-minute electrical timer with a HOLD feature. Mixing tools are mounted in a bayonet shaft in the planetary head.

Construction

Mixer frame of heavy-gauge, welded, rolled steel plate. Durable powder coated finish used on those surfaces not constructed of stainless steel. Top cover, splash apron and planetary head cap in heavy-gauge stainless steel. Molded PVC feet pads. Bowls in stainless steel. Mixing tools in cast aluminum or stainless steel. Bayonet shaft in stainless steel. Variable

speed V-belt transmission based on precision machined cast iron pulleys. Springloaded moveable pulleys in the variable speed drive for automatically adjusting of the tension of the special V-belt. Planetary mixer head of unique design. The planetary head revolves in heavy-duty ball and needle bearings around the main shaft. Precision milled beveled gear on the main shaft engages the bayonet shaft and the fixed internal gear ring through a double set of milled gears obtaining extra high torque capabilities of the mixing tools. Precision milled cast iron bowl arms lower and raise the bowl and clamp it in a precise position relative to the mixing tool allowing for small tolerances between tool extremities and the bowl.

Attachment drive directly coupled to the motor securing maximum power output to the meat grinder or vegetable cutter. The 198 rpm high speed and the powerful motor give the meat grinder an unusually high capacity in relation to the size of the mixer.
